Computer Science graduate with hands-on experience in MERN Stack, Next.js, and Fast API development. Built multiple full-stack applications including an ML-powered Heart Disease Prediction System and E-Commerce platforms. Strong foundation in JavaScript, React, Node.js, and MongoDB with a passion for building scalable web applications.

EDUCATION

- ❖ **Bachelor of Science in Computer Science** | GC University Faisalabad CGPA: 3.22 | 2022 – 2026
- ❖ **FSC** | Govt. Islamia College Chiniot. 70% | 2020 – 2022

SKILLS

❖ Technical Skills

Web Development: React.js, Next.js, Redux, CSS3, Tailwind CSS, HTML5, Node.js, Express.js, MongoDB, MongoDB Atlas, MySQL, Git, GitHub, Postman

DevOps: CI/CD Pipeline, GitHub Actions, Vercel

Programming Languages: Python, JavaScript, Java, C++

- ❖ **Artificial Intelligence:** AI/ML, Data Cleaning, Models Training
- ❖ **Soft Skills** Adaptability, Problem-Solving, Team Collaboration

EXPERIENCE

- ❖ **Digiunction — Full Stack / MERN Stack Developer** **July 2026 – Present**
 - Working as a Full Stack Developer, developing and maintaining web applications using **React.js, Next.js, Node.js, Express.js, and MongoDB**.
 - Developing responsive and reusable frontend components and integrating RESTful APIs.
 - Building and managing backend APIs, MongoDB schemas, and database operations.
 - Implementing authentication, authorization, dashboards, and role-based functionality.
 - Debugging application issues, improving existing features, and collaborating through **Git/GitHub**.
 - Working on real-world e-commerce, dashboard, and business web applications.
- ❖ **Full Stack Development Internship | Leading to Job at Digiunction** **15 Jan 2026 – 01 July 2026**
 - Developed and maintained scalable full-stack web applications using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, following clean, modular, and maintainable coding practices.
 - Worked on **MARKANT**, an energy-sector portfolio website, developing responsive frontend interfaces and integrating backend functionality to deliver a professional and user-friendly web experience.
 - Developed and enhanced **Admin Dashboards**, including creating and integrating **admin routes, role-based access, and administrative functionalities** for managing application data and users.
 - Built and contributed to multiple **E-commerce web applications**, implementing product management, dashboards, API integration, and responsive user interfaces.
 - Integrated frontend applications with **RESTful APIs and MongoDB databases**, ensuring smooth data flow between frontend, backend, and database layers.
 - Improved UI responsiveness, usability, and component performance through reusable React components and frontend optimization.
 - Participated in **code reviews**, debugging, testing, and implementation of feedback from senior developers to improve code quality and application functionality.

PROJECTS

- ❖ **Food Panda Website (MERN Stack)** (2 July 2026 - 07 Sep 2026)
Developed a full-stack Food Panda-style food delivery platform using the **MERN Stack (MongoDB, Express.js, React.js, Node.js)** and Tailwind CSS and Material UI, featuring role-based authentication for Customers, Restaurant Owners, Riders, and Admins, restaurant and product management, search and filtering, cart and order management, checkout, order tracking, 5-star ratings and reviews, and dedicated admin/owner dashboards. Implemented secure **JWT authentication, Redux Toolkit state management, RESTful APIs, Axios interceptors, MongoDB Atlas**, protected routes, and responsive modern UI/UX optimized for desktop, tablet, and mobile devices.
Repository Link: <https://github.com/MuhammadJunaidZafar12/Food-Panda-Website.git>
- ❖ **Heart Disease Detection (MERN+NEXT JS+ML+FastAPI+FYP)** (Dec 2025-June 2026)
Developed an intelligent web-based system for early heart disease prediction using Machine Learning models trained on clinical patient data. Integrated FastAPI for ML inference and built a responsive interface using MERN Stack and Next.js to enable real-time risk assessment and patient data management.
Repository Link: <https://github.com/MuhammadJunaidZafar12/Heart-Disease-Detection--FYP.git>
- ❖ **E-Commerce Website (MERN Stack)** (08 Aug 2025-01 Nov 2025)
Built a full-stack E-Commerce platform using MERN Stack featuring JWT authentication, Stripe payment integration, Admin Dashboard, product management, pagination, and responsive UI.
Repository Link: <https://github.com/MuhammadJunaidZafar12/E-Commerce-Website.git>
- ❖ **Food Fusion | Restaurant Website (Semester Project)** (02 Feb 2025-15 May 2025)
Developed a responsive fast food website using **HTML, CSS, and JavaScript**, featuring an interactive menu, order placement functionality, and engaging UI animations to enhance user experience.
- ❖ **Spotify Music Web App** (05 June 2025-02 Aug 2025)
Developed a **Spotify clone** using **HTML, CSS, JavaScript**, integrating the Spotify Web API to fetch and play songs, display playlists, and manage user interactions. Utilized Git for efficient version control.
- ❖ **E-Commerce Cart** (02 Nov 2025-15 Dec 2025)
Developed a full-featured e-commerce cart application using **the MERN stack (MongoDB, Express.js, React.js and Node.js)**, cart management, user authentication, and order processing and Integrate Stripe payment gateway.

ACHIEVEMENTS & HOBBIES

- ❖ Successfully completed Full Stack Development Internship at Dijunction.
- ❖ Built Final Year Project integrating Machine Learning, Fast API, and MERN Stack technologies.
- ❖ Active contributor on GitHub with multiple public repositories.
- ❖ Enjoy coding challenges, UI/UX development, and contributing to open-source projects.
- ❖ I am eager to learn new Technologies and also make scalable web applications.
